About Sumona

Automate your current ecosystem

.....

Metamorphose Your Life Make it Smarter Than Ever

Unfurling automation and ensuring it reaches even to the corner sets of humankind, Sumona is on a mission to ensure that “leveraging” not only reaches out to everyone as a mere concept but as a fully experienced reality. By making its elegantly optimized products accessible to everyone, it is doing its bit by giving the humankind freedom it seeks, at the cost of safety and surveillance. Your home will not only be where your heart is, it will also be where your smartphone is!

Sumona’s aim is to make automation more and more accessible to all the economic classes of people. To decrease till the extent of being negligible, and then to extinct the need of human efforts because of inefficient system, by providing intelligent hardware and software solutions that are designed to make systems smarter and hence let humans work effortlessly.

By implementing technologies such as IFTTT, Capacitive Touch Control, integration of many devices under one gateway, Zigbee, and a lot more, Sumona wants to highlight areas in which a little automation can make wonders by, significantly decreasing insecurities related to the monitoring of a place and offering control solutions to its users.

Smart DoorLocks

“Manage not only the entries and exits at your place,
but also the environment around your door using Sumona’s Smart Door Lock”

Adept when employed |Sophisticated in looks

If we state “No one would be able to enter without your permission, if you are using Sumona’s Smart Door Lock”, that would be too obvious. But if we state “Sumona’s Smart Door Lock would be able to have a complete idea about your door’s surroundings and even let you control the entries as well as exits from your place via your smartphone”, it’d be shockingly true, or truly shocking!

They say “the first impression is the last impression.” Practically thinking about this, your door lock is what people see even before, they see you. So, why compromise on its design? Sumona’s Smart Door Lock has been manufactured keeping in mind this philosophy

You can operate Sumona’s Smart Door Lock using your fingerprint, Bluetooth, RFid Card, as well as your Smartphone. Because it has multiple ways to unlock, it lessens the probability of demolishing your door in case you forget one way to open it. Sumona’s Smart Door Lock is designed for easing out the monitoring and controlling of the most important junction at your place i.e. Door.

Premium Door Lock With Inside Unite (Screen)

An important monitoring aspect of Sumona's Smart Door Lock is fulfilled by its high resolution camera. The entries and exits at your place would be completely captured and reported.

This would enable you to suspect and conclude about the missing elements at your place right after the exit or entry of someone.

Making sure that you've got everything covered, Sumona's smart team has enabled the feature of generation one time passwords for all the guests who like to pop in any minute at your place. Generate the OTP and share it with them to easily unlock Sumona's Smart Door Lock.

Smart Sensors

Explore Smart, Wireless & Self Reporting Zigbee as well as Wifi Sensors

Smart Sensors

Operable from anywhere, once connected with a device, Sumona's Wi-fi and Zigbee sensors will report to you nuances in the environment of that device. Using this information you can respond accordingly to the situations.

Sumona's Zigbee sensors are motion-sensitive, can detect a water leak, they are temperature as well as light-sensitive. In an integrated fashion Sumona's Wi-fi and Zigbee sensors can instantaneously respond about the AC, door, electrical appliances as well as taps at your place and let you monitor them 24*7 via your smartphone.

Sensors That Keeps You Connected

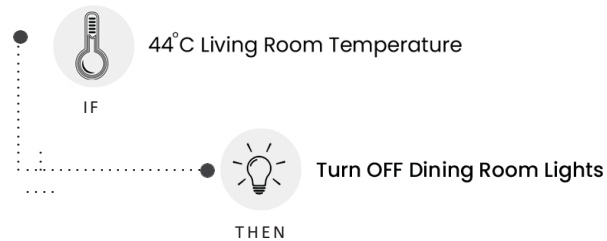

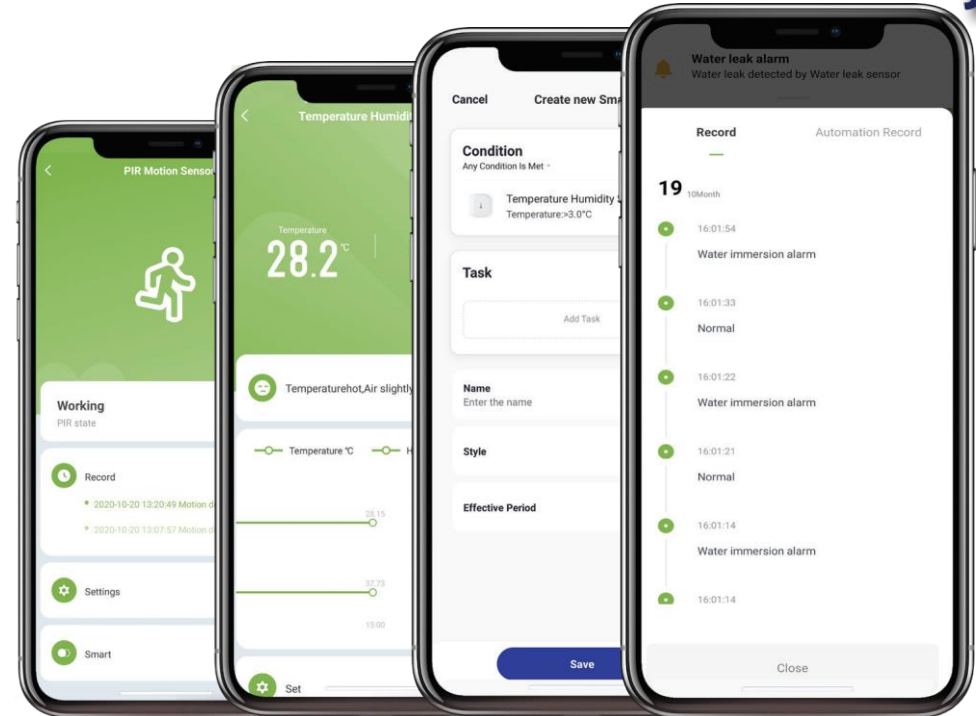

Sumona's Sensors stores and displays Data by consuming lower electricity, yet establishing wireless communication with all your devices.

Smart Zigbee Sensors

Based on low-rate wireless personal area networks, Sumona's Zigbee sensors are less expensive when compared to other wireless personal area networks.

This makes them the most suitable smart devices that can be used for home automation. They find application with variety of smart devices such as wireless switches, panel lights, retrofit, and every other Sumona's products. Sumona's Zigbee sensors' low power consumption is power output dependent and is environment specific.
